The Most Eagerly Awaited Action Game of the Year!

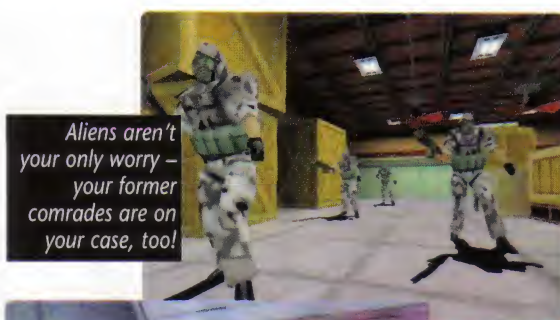

Half-Life™

A decommissioned missile base infested with aliens. Not the typical suicide squads just waiting for you to finish them off. Aliens with brains. Their intelligence may be artificial but, hey, it's enough to

make them think. And these aliens think they want to live. Which pretty much means killing you. What's worse, they're working together in packs to hunt you down and fry your butt.

But don't worry, you still have a good head and a strong pair of shoulders. If you're smart enough to keep

one firmly attached to the other long enough to put your firepower to work, you just might get through this thing alive. Coming this Spring. Reserve your copy now.

Aliens aren't your only worry — your former comrades are on your case, too!

A failed experiment has turned an old missile base into a maze of monster fodder.

Plumbing

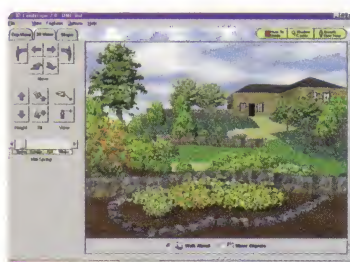

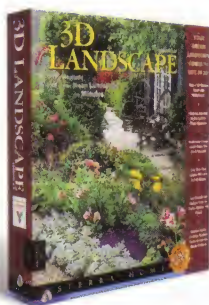

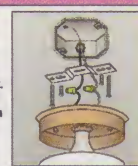

Jammed Garbage Disposal

Warning: If your disposal hums but doesn't grind when you switch it on, something is probably stuck inside. Once it's out, then push the reset button or the reversing switch on the bottom of the unit. Newer disposals often have a hexagonal fitting for an Allen wrench on the bottom. Insert the wrench and turn it back and forth to free the mechanism. With older models, a more brutish approach may be necessary. Lever a broom handle against the side of the drain opening and against your disposal's blades. Move the blades back and forth to release the clog.

Get expert help with the *Home Improvement Encyclopedia* and *Electrical Wiring*.

Warning: First, shut off power to the light's circuit. Study the instructions to learn how to attach the fixture to the box. You'll need some kind of lighting adapter to mount your fixture to the box. Gently lower the old fixture, if any. Disconnect its leads, but not any other wires you may find in the box. Install the adapting device recommended by the manufacturer. Splice the new fixture's leads to the house wires. Fold the wires up into the box and attach the fixture. **Tip From the Pros:** Insert each stranded fixture wire into a wire connector before you push in a solid house wire. Then tighten the connector.

Includes a database with over 2,000 plants, trees and shrubs.
